

# Swiss energy perspectives

## The JASM team

Schweizerische Eidgenossenschaft  
Confédération suisse  
Confederazione Svizzera  
Confederaziun svizra

Swiss Confederation

**Innosuisse – Swiss Innovation Agency**

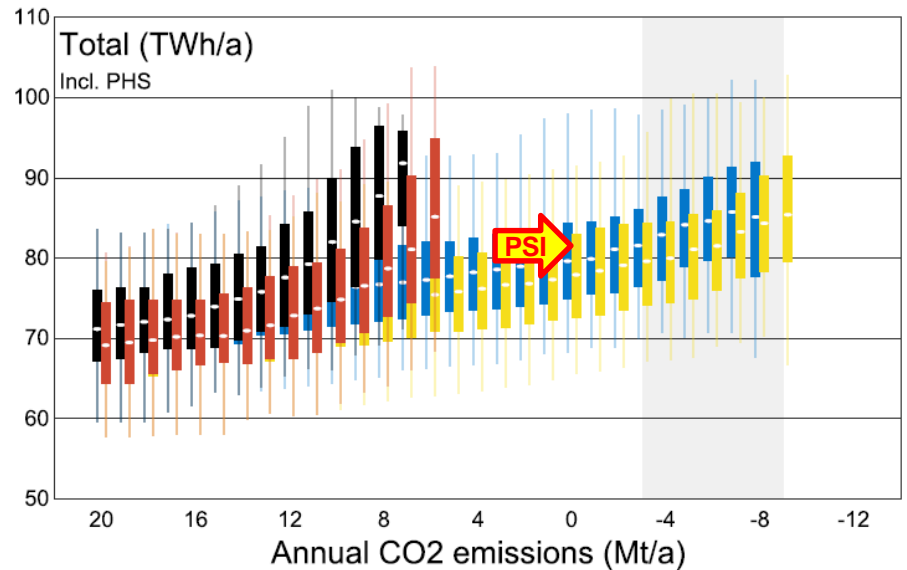

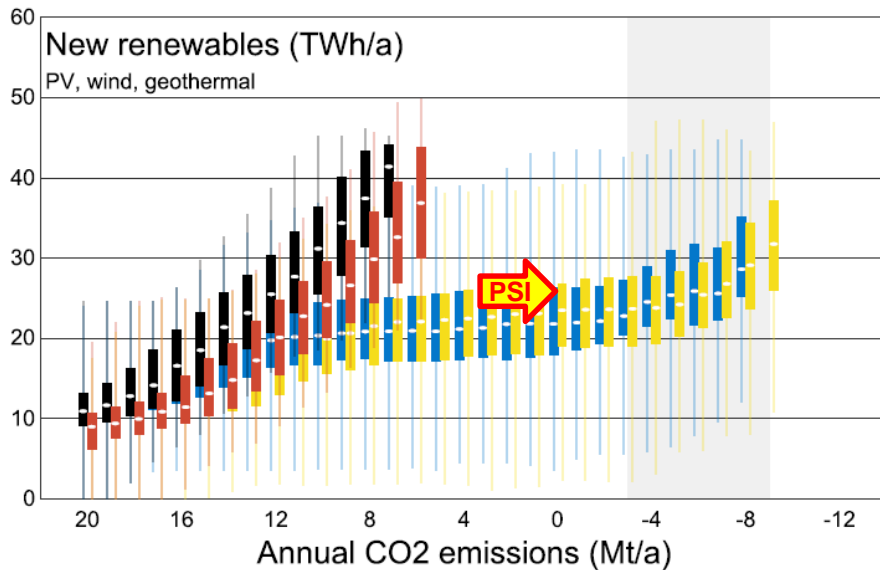

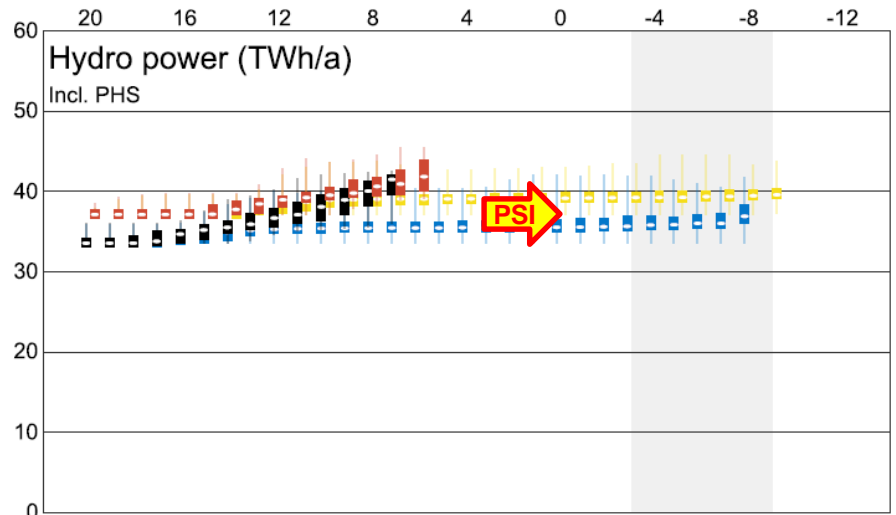

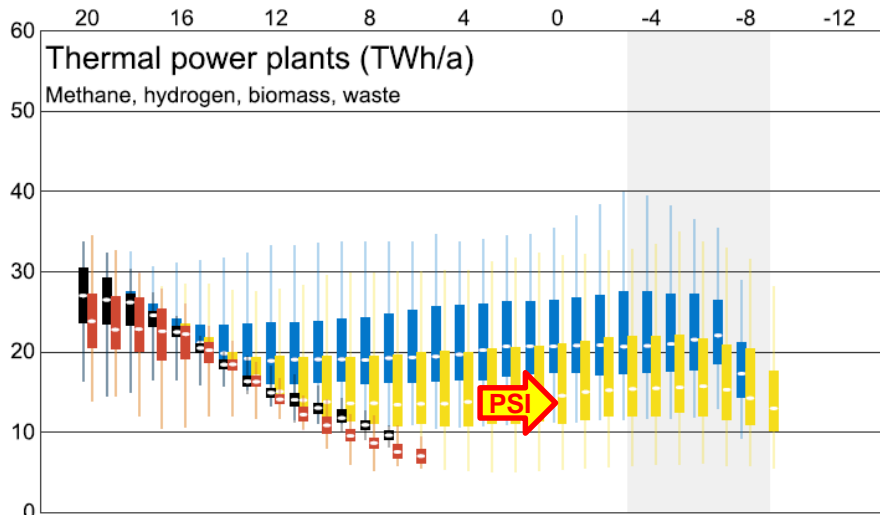

# Synthesis of results

## Sectoral and full energy system models

- The JASM framework integrates data, sectoral models and energy system models
- Very different models were used to tackle the same question: how to reach net-zero GHG emissions
- The value is not in the single model results, insights become solid when they are confirmed by different models

# Example for synthesis

Synthesis report will be ready in January
